Hydrated Acellular Dermal Matrix

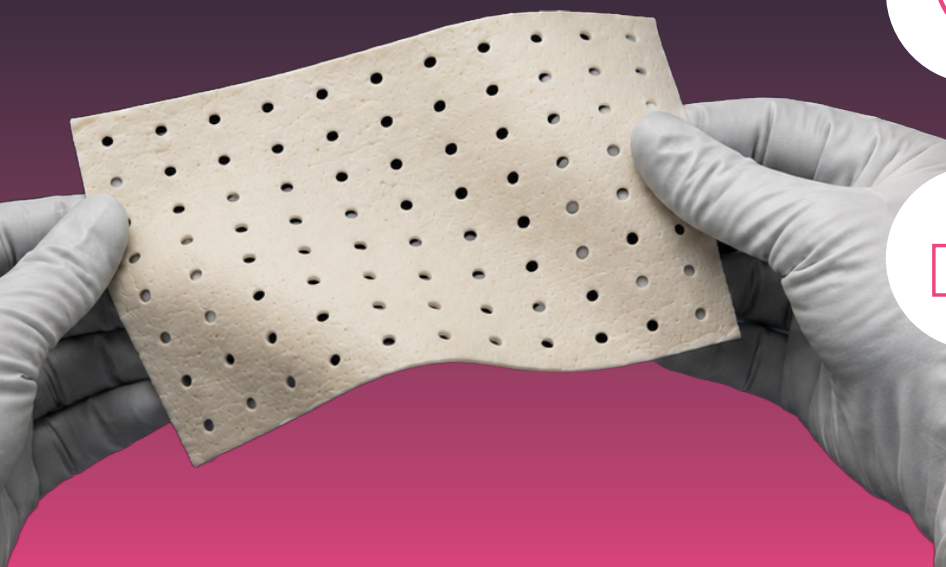

Biologic matrix for
dermal reconstruction

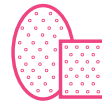

Engineered for Tissue Support

Empliq™ Dermal is an acellular dermal matrix (ADM) sourced from donated human skin and designed to replace lost or damaged dermal tissue.

Gentle processing maintains the structural properties and components of the extracellular matrix, creating an allograft that can cover, support or reinforce soft tissue defects.

**Comprehensive
Portfolio**

**Perforated
Options**

**Consistent
Thickness**

Highly Pliable

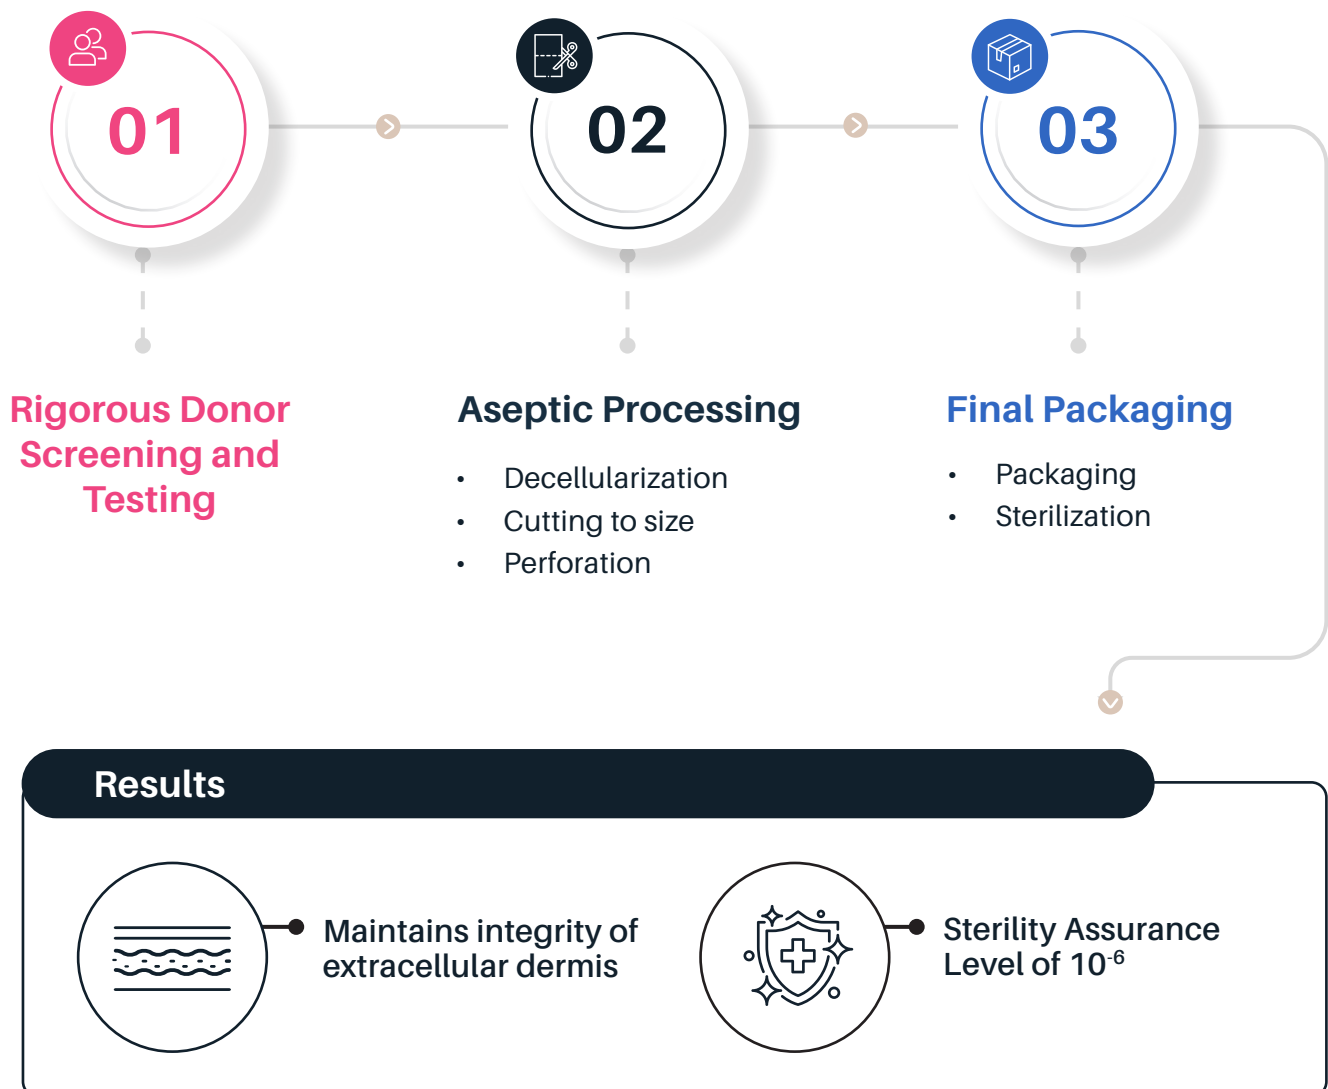

Sterile

Implantation-ready

Less is **More**

Empliq™ Dermal is produced by accredited U.S tissue banks using a proprietary, gentle process designed to remove cellular debris while retaining key extracellular matrix components.

Thickness range: 0.7 – 1.5 mm

Empliq™ Hydrated Acellular Dermal Matrix
Biologic matrix for dermal reconstruction

Product Code	Size (cm) (length x width)	Shape
EM-DM04040	4 x 4	Sheet
EM-DM04080	4 x 8	Sheet
EM-DM10050	10 x 5	Sheet
EM-DM04121	4 x 12	Sheet
EM-DM04161	4 x 16	Sheet
EM-DM06121	6 x 12	Sheet
EM-DM08161	8 x 16	Sheet
EM-DM12161	12 x 16	Sheet
EM-DM16201	16 x 20	Sheet
EM-DM16201P	16 x 20	Sheet, perforated
EM-DM20201	20 x 20	Sheet
EM-DM10201E	10 x 18	Ellipse
EM-DM10201EP	10 x 18	Ellipse, perforated
EM-DM13211E	13 x 21	Ellipse
EM-DM13211EP	13 x 21	Ellipse, perforated

Possible complications can occur with any surgical procedure including, but not limited to pain, infection, hematoma and/or immune rejection of the introduced tissue.

Physicians should review the package insert for product information, including indications, contraindications, precautions, storage and handling instructions, and warnings.
